Registering a Student to receive Live Updates and Ballots

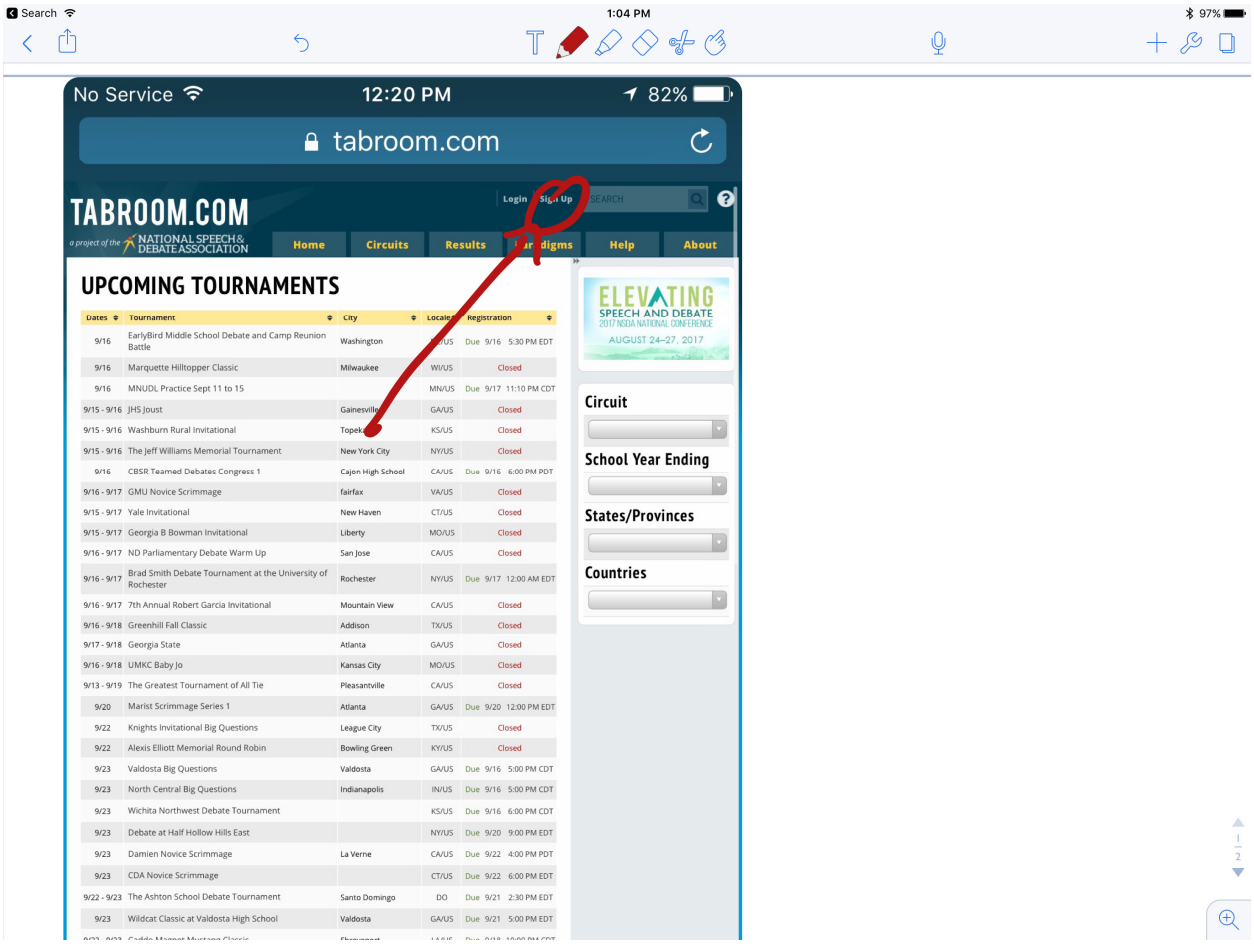
Before the Tournament:

Many students simply choose to follow themselves at each tournament. Registering for tournaments means that students do not need to link at every tournament, and it allows students to see electronic ballots.

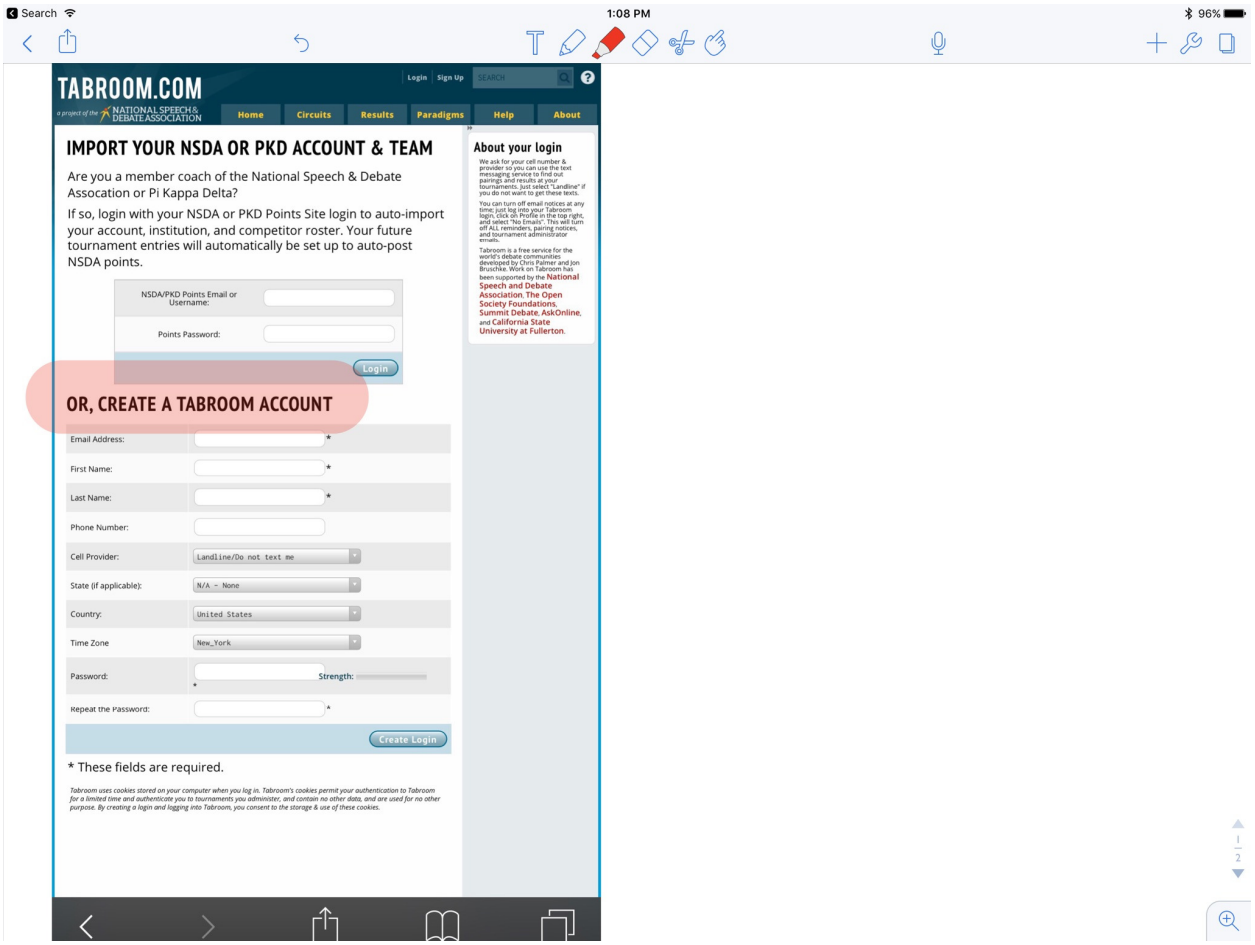
As you always do, you will need to add students to your roster. Register the students for the tournaments you always do.

After you have registered the students for your school, instruct your students to do the following (You must have the student on your roster or this will not work. You also need to be sure that you and the student are using the same name. Misspellings will cause problems.)

1) Have your student go to www.tabroom.com. In the upper right hand corner, the student should SIGN UP.

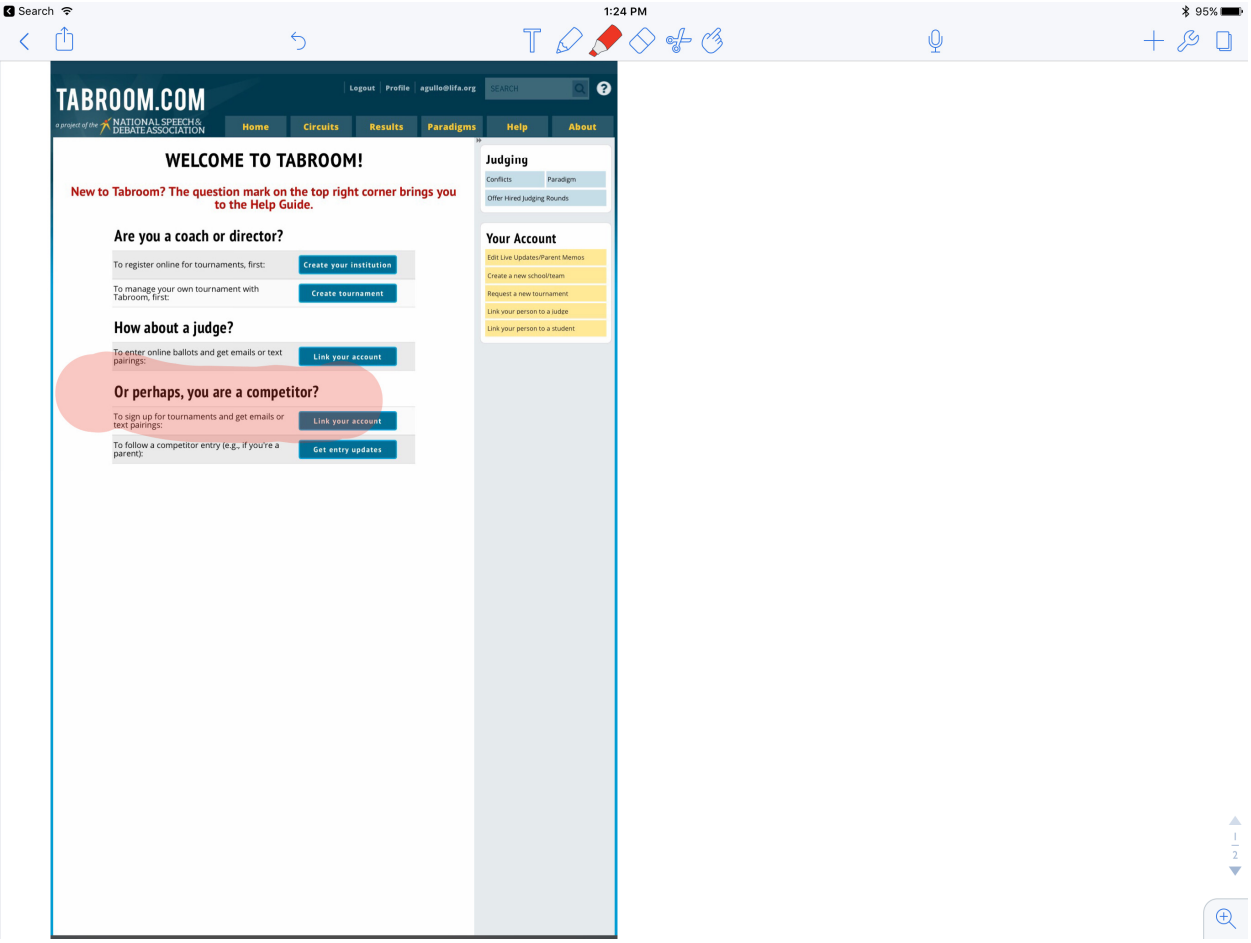


2) The student should CREATE A TABROOM ACCOUNT.

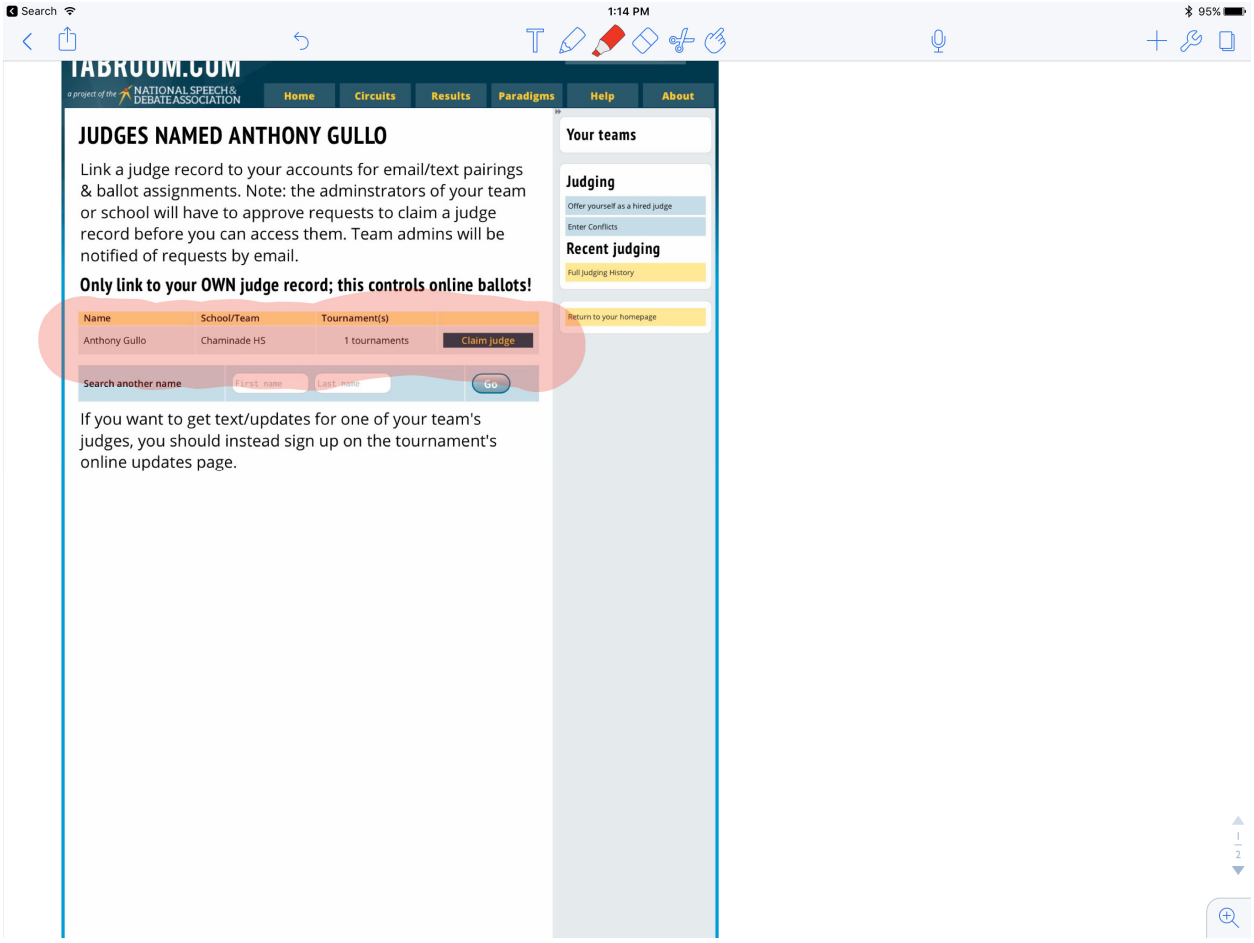


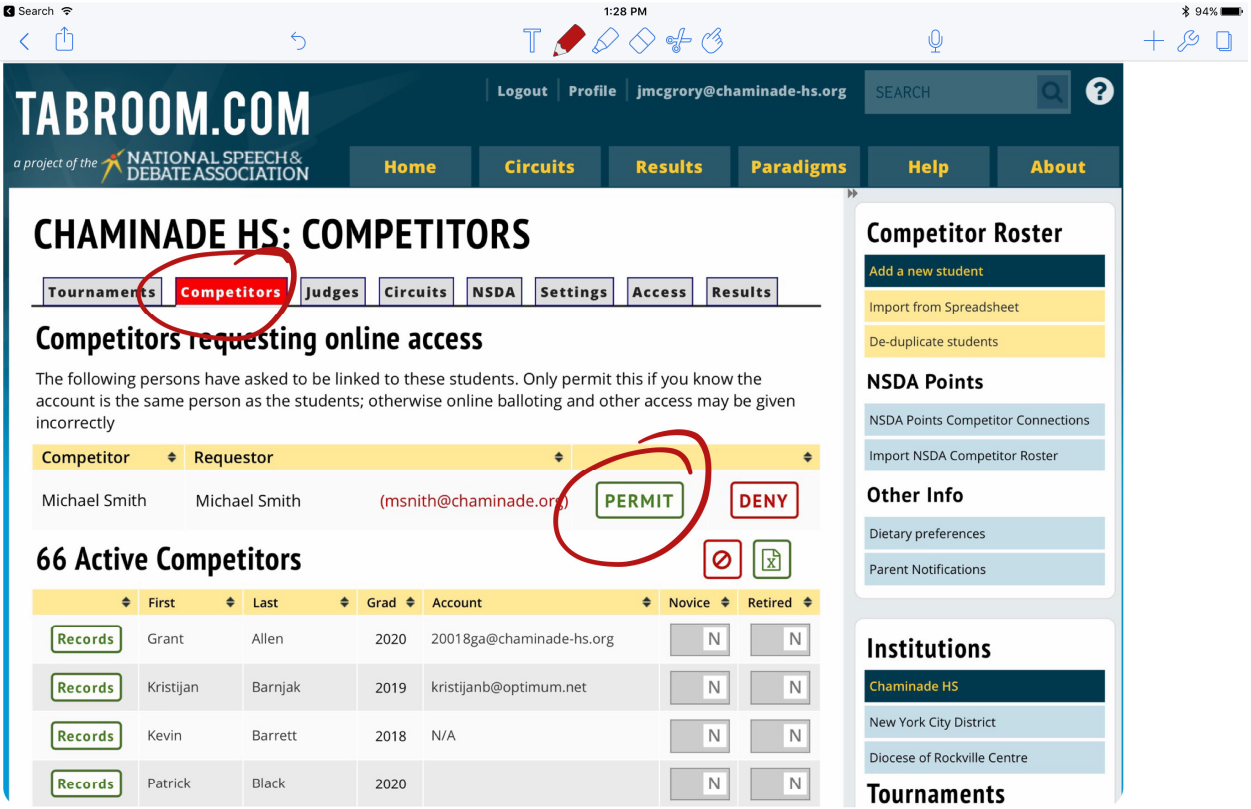
3) After they create the login, they will be brought to a page that says, WELCOME TO TABROOM!

4) Under the Tab OR PERHAPS YOU ARE A COMPETITOR? They should link to their account.



5) If you and the student have put in the same name, it will bring the student to a page that shows your school. The student will link to your school.





6) You, as the coach, will receive an email. XXXXX wishes to join your team. When you go onto tabroom, you will see the Judge tab will be red. Click on that tab. You will see the names of students who wish to be linked. Link them up.
